## EDUCATION

### B Tech in Computer science and business systems

Govt . Model Engineering college , Thrikkakkara

09/2023 - Present

Kochi , India

## PERSONAL PROJECTS

Bunkr - is a student-focused attendance tracker that gives you the insights you actually need. Built as a better alternative to Ezygo

- Contributed to this project along with my teammates .

BidSnap - An Online Auction System built using React , Flask , MySQL (02/2025 - 04/2025)

- Built the whole project from scratch by setting up proper authentication , functionalities , real time updates etc...

Privy - Privacy-focused messaging platform designed to ensure your conversations remain secure and untraceable. Utilizing modern cryptographic encryption, including principles of PGP and a zero- storage architecture, (02/2025 - 02/2025)

- Contributed to this project in a hackathon - FOSS hack , along with my friends . My main contribution was in the backend, setting up the server

Faux Deepfake Detector (12/2024 - 01/2025)

- A chrome extension that helps you spot fake images and videos while browsing the web. Contributed in backend , especially in connecting with the AI model

Grammr (08/2024 - 09/2024)

- A Grammar checker built using Next JS and Gemini API

## WORK EXPERIENCE
